

AVALON 2009
AUSTRALIAN INTERNATIONAL AIRSHOW
AND AEROSPACE & DEFENCE EXPOSITION
10-15 MARCH 2009 GEELONG VICTORIA

incorporating

systems

equipment

and

technology

for

air and land

defence

the *air/land* interface

the **essential** defence industry event for Australia and the Asia Pacific

AVALON MEANS BUSINESS

The biennial Australian International Airshow and Aerospace & Defence Exposition is the largest and most comprehensive defence industry event in the southern hemisphere.

First held in 1992, *AVALON* is one of the Asia Pacific's most prestigious aviation, aerospace and defence events.

In 2005, *AVALON* for the first time featured displays, not only of airborne military technologies but also, of land-based equipment and ground defence systems.

Hosting *LanDef* 2009, *AVALON* in March 2009 will again showcase air and land defence technology for Australia and the Asia Pacific region.

Recognising the commonalities and interconnections between air and ground-based defence systems, *LanDef* has become a regular feature of the biennial Australian International Airshow and Aerospace & Defence Exposition at Avalon.

The Australian International Airshow and Aerospace & Defence Exposition at Avalon in March 2009 will be the essential defence industry event for Australia and the Asia Pacific.

Incorporating *LanDef* 2009, it is an increasingly powerful marketing and networking forum which should not be missed.

AVALON means business!

LanDef – the air/land interface

Focusing on the *air/land* interface, *LanDef 2009* will be a major component of the international aerospace and defence exposition at AVALON.

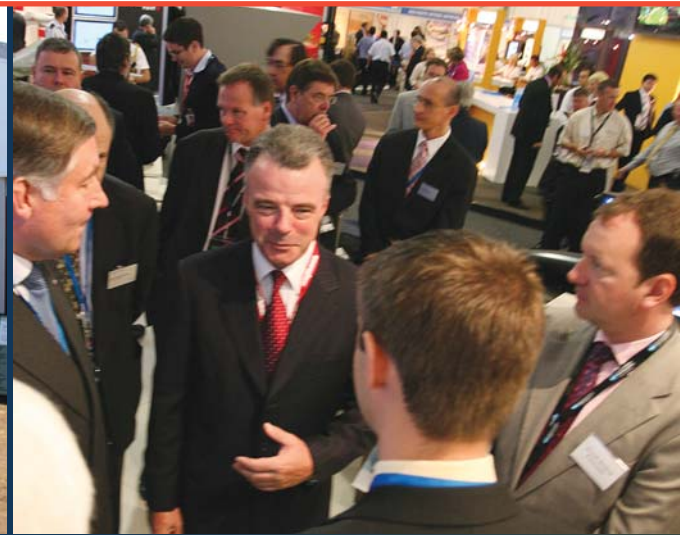

Highlighting the synergies between, and frequent interdependence of, aerospace and land defence solutions, *LanDef 2009* will again feature extensive displays of land-based equipment, ground warfare technologies and land-defence systems.

Supplementing AVALON's aerospace focus, *LanDef 2009* will provide a unique medium for showcasing land-based equipment and ground-defence technology.

LanDef 2009 will feature:-

- Military helicopters
- Unmanned aerial vehicles
- Fighting vehicles
- Land-based military hardware and technology
- Heavy lift and transport aircraft
- Weapons, sensors and guidance systems
- Ground support maintenance systems
- Training simulators and systems
- Military transport vehicles
- Reconnaissance, surveillance and target acquisition technologies
- Command, control and communications systems
- Border Security and Counter Infiltration Equipment
- Detection and Recognition Systems
- Electro Optics and Night Vision Equipment
- Navigation Systems
- Peace Operations Equipment
- Rapid Forces Equipment
- Rescue Operations Equipment
- Survival Equipment
- Vehicle Systems

AVALON – a special venue

AVALON is a unique location and the ideal venue for showcasing the *air/land* interface.

It co-locates internal exhibition pavilions, external display areas, aircraft static display parks, a vehicle mobility area, UAV operational demonstrations and extensive flying displays.

As well as internal pavilion displays, substantial outside areas are available for the exhibition of heavy armaments, defence equipment, aircraft and military vehicles.

In addition, a range of hospitality and entertainment options, meeting rooms and conference facilities are offered on site.

All are uniquely integrated into the one convenient venue.
